

Donaldson Blue®

The Broadest Premium Filter Coverage
for On- and Off-road Equipment

**WE RAISED THE STANDARD
IN FILTER PERFORMANCE.**

**SAY HELLO TO
DONALDSON
BLUE.**

Donaldson®
BLUE

Donaldson Blue® filters reduce operating cost and increase equipment uptime

Choosing the best Donaldson filtration solutions for heavy-duty engines and equipment is now easier than ever. They're all blue. **Donaldson Blue®** to be exact. Made using Donaldson's most advanced filtration technologies, Donaldson Blue filters are the definitive choice to protect equipment, reduce maintenance cost and increase equipment uptime.

With more than 150 air intake, lube, coolant, and on-board fuel filters – plus advanced bulk fuel filtration systems that clean fuel before its pumped into equipment – Donaldson Blue filters give you the broadest premium coverage of any filtration brand. And since they are direct replacements, installation is easy and precise. Best of all, you can trust Donaldson Blue filters to clean in the hard-working environments that heavy-duty equipment encounter every day.

Proven Fine Fibers Make a BIG Difference

The Donaldson Blue line includes proven technologies like Ultra-Web® fine fiber media for air filtration, Synteq™ media for lube and coolant, and game-changing Synteq XP™ media for fuel filtration. These Donaldson proprietary media technologies stop more contaminant than standard cellulose filters, which leads to better engine protection and longer engine life.

Donaldson Blue[®] Air Filters

Donaldson, the company that *invented* air filters for heavy-duty diesel engines almost 100 years ago, was also the first to develop fine fiber air filter media for the diesel engine market nearly 20 years ago.

Ultra-Web[®] Advantages

- Engineered to perform in extreme temperature and humidity conditions, unlike ordinary fine fibers
- Proven in the real world – used in diesel engines for nearly two decades
- On-highway trucks are guaranteed to go *twice the distance* compared to standard cellulose filters

Longer Engine Life

In laboratory and field tests, **Donaldson Blue[™]** air filters provided better engine protection by allowing much less contaminant to pass through than cellulose air filters. Donaldson Blue air filters also reach an optimal 99.97% efficiency much quicker than conventional cellulose filters – and have an overall efficiency up to 99.99%! Equipment owners using Donaldson Blue filters with Ultra-Web media experience improved engine protection and power, plus lower overall life-cycle costs.

Longer Filter Life

The smaller interfiber spaces of Ultra-Web[®] fine fiber technology hold more submicron contaminant than conventional filters with cellulose media. The high dust-holding capacity of submicron particles promotes longer filter life.

Media Comparative Cross Section

| | | |
|---|---|-------------------------------------|
| <p>Conventional Cellulose</p> <p>Airflow ↓ ↓</p> <p>Dust Particles</p> <p>Cellulose Media Cellulose fibers are larger than Ultra-Web[®] fine fibers and have larger spaces between the fibers, which causes contaminant to load in the depth of the media and plug the airflow path, resulting in higher restriction and less capacity.</p>  | <p>Donaldson Blue[®] Ultra-Web[®] Fine Fiber Technology</p> <p>Airflow ↓ ↓</p> <p>Fine Fiber Layer</p> <p>Dust Particles</p> <p>Ultra-Web[®] Media Ultra-Web fine fibers have submicron diameters and small interfiber spaces, which result in more contaminant being captured on the surface of the media, promoting lower restriction and longer filter life.</p>  | <p>ULTRA-WEB[®]</p> |
|---|---|-------------------------------------|

Donaldson Blue® Fuel Filters

Delivering the Cleanest Fuel – Period.

Donaldson Blue filters with Synteq XP™ media offer best-in-class contaminant capture and containment. Tests have proven that they deliver fuel that is **4x CLEANER** than competitors' best filters. **Clean fuel minimizes expensive repairs** and **unplanned downtime** – it's better for high pressure common rail (HPCR) fuel systems, including injectors, pumps, and engines.

Donaldson Blue filters deliver:

- **Best capture** and **retention** of injector damaging contaminants
- **Best performance** in heavy-duty environments (inferior filters can "slough" contaminant during engine vibration)
- **Best** available fuel filtration **media** – Synteq XP™
- **Best protection** for today's sophisticated injectors HPCR injectors

Donaldson's proprietary Synteq XP media creates small, consistent inter-fiber spacing – increasing filter capacity. These unobstructed pores result in reduced pressure drop and increased surface area for capturing and retaining more microscopic particles.

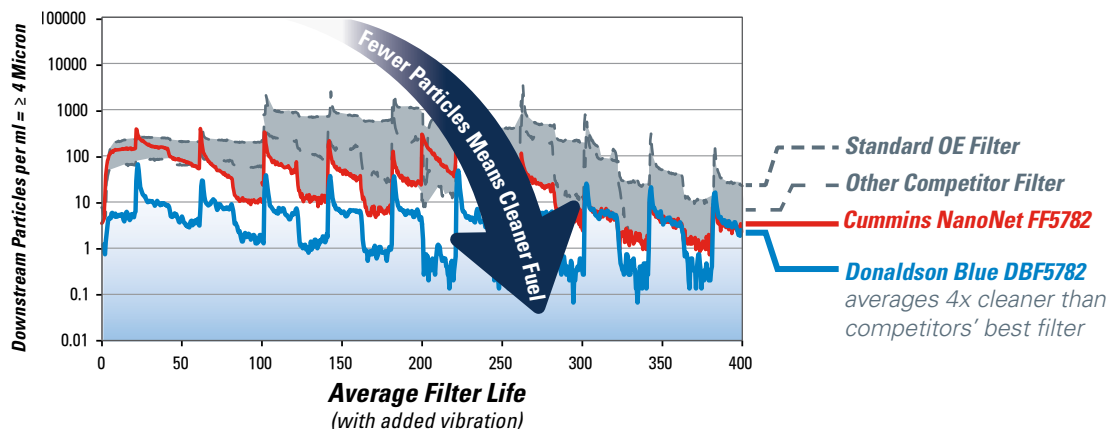

START TO FINISH

4x cleaner fuel

THAN THE BEST COMPETITIVE FILTER

Our proven **Donaldson Blue Filters** average **4x LOWER downstream particle** concentration than the competitors' best products. Lower particle release means less micro-contamination flowing downstream to fuel injectors – protecting your hard-working equipment and maximizing your uptime.

Donaldson Blue DBF5782 for Cummins QSK engines PROVIDES CLEANER FUEL OVER THE LIFE OF THE FILTER

Particle retention was tested under SAE J1985 single-pass test standards with added vibration and increased particulate concentration. Test conducted March – April 2013 with a sample size of six filters per manufacturer.

Cummins® is a registered trademark of Cummins, Inc.

Donaldson Blue[®] Lube and Coolant Filters

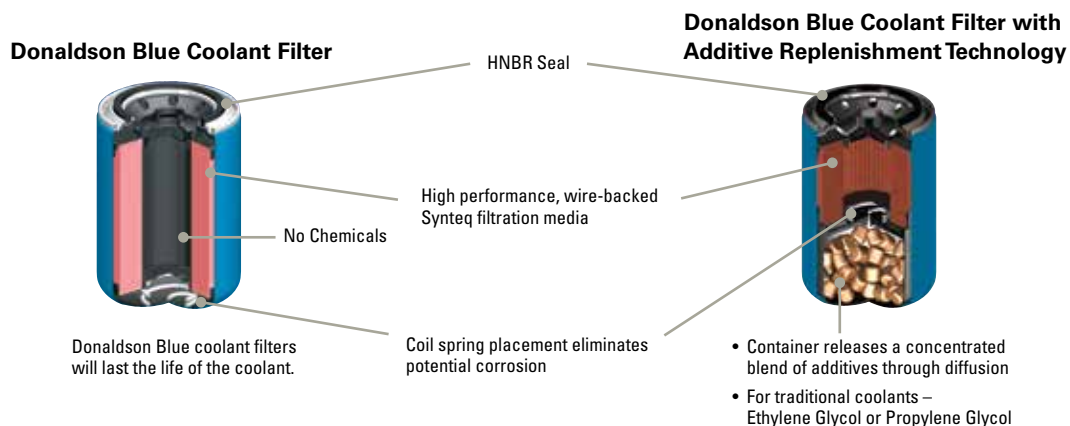

Extended Service Lube Filtration

Donaldson Blue[®] lube filters with Synteq™ media reduce oil consumption, increase engine protection and reduce operating costs. They provide the optimal balance of efficiency, capacity and restriction, and remove **more than 90% of contaminants** that are 10 microns or larger, compared to 50% or less for typical cellulose filters. At the same time, they deliver **nearly double** the contaminant carrying capacity of standard cellulose filters. Fully synthetic Synteq media also delivers **lower restriction** to provide **maximum oil flow**. Donaldson Blue lube filters are designed specifically to provide **longer filter life** – a critical component of any extended filter maintenance program.

Extended Service Coolant Filtration

Donaldson Blue coolant filters use Synteq media to remove fine contaminants from sensitive coolant systems. Donaldson Blue coolant filters with *Additive Replenishment Technology* also maintain cooling system balance through a controlled release of additives, which **extends the coolant maintenance interval** up to once a year or 150,000 miles / 195,000 km.

Clean Fuel and Lube Solutions

Contaminants and water are enemies of modern diesel engines, robbing vehicles and equipment of performance and longevity. Removing contamination **prior to pumping fluids** into equipment helps on-board filters do their job better, while protecting pumps and injectors.

Donaldson Blue bulk fuel filters help:

- Prevent unscheduled downtime
- Save on costly component replacement
- Improve fuel economy
- Protect your investment with confidence
