# Hydraulic Filter

Replacement filter for Hitachi/Komatsu 4333469

## Donaldson Hydraulic Filters Keep You Up and Running

Announcing the availability of **P576670**. The new and improved Donaldson Hydraulic replacement filter for Hitachi/Komatsu's part 4333469. For a hydraulic element, dirt removal is crucial and the original element which uses cellulose media and is 50% efficient at 10µm was not quite up to the task. Donaldson went to work and designed an upgraded element utilizing high performance Synteq XP media which is 99.9% efficient at 10µm. When compared to the original element, the upgraded element boasts nearly four times the dirt holding capacity, lower pressure drop, and a cleaner fluid level. All of these lead to a healthier hydraulic system resulting in increased uptime and lower cost of equipment ownership.

### FEATURES

- **Superior efficiency** — for cleaner fluid and less damaging contaminant in your hydraulic systems
- **Longer filter life** — for extended filter change intervals, reducing time and expense for servicing equipment
- **Reduced flow restriction** — to minimize energy loss and time in filter bypass, even during cold starts

**Long story short** — Donaldson hydraulic replacement filters deliver better system protection and performance.

**P576670**
